About the branded affiliate link placement in this report.

Each brandable affiliate link available to you is placed in a pattern.
You do not have to be concerned with placing your affiliate links in this pattern as that will be automatic when you do the branding. This is just for your information so you will be able to verify the branding of your affiliate ID information at the given links in this report. After branding this report, scroll your mouse over the various links and you will see YOUR branded links embedded into certain active links.

The pattern goes as such:

In each product review paragraph there are at least 2 active affiliate links.
Each link that you can brand will alternate from 1st active link to 2nd active link.
Example: In the 1st product review paragraph YOU get the 1st brandable link.
The 2nd one is taken. In the very next product review it alternates where the 1st active link is taken and YOU get the 2nd active link to brand.

In each consecutive product review paragraph, this type of alternating **pattern** is used as a fair brandable link placement system.

* Exception* A few of the product review paragraphs are not brandable. The reason is their affiliate programs are not FREE to join without buying the product and therefore you would have no affiliate ID to brand. However, they represent beneficial programs that I felt should be included in The Hot Page Report.

To receive your own free brandable copy of this report just like this one… click here now!

If you need an affiliate ID for a given product mentioned in this report, follow the appropriate link(s) below and signup to get your ID.
